### ANGLE HEAD GEARING

When angle head gearing is replaced, wipe on a thin coat of Molykote, grade G; only a small amount is necessary. An 8 ounce tube is available under part number 540394.

 **CAUTION** Do not use substitutes for oil and grease. This could result in damage to the tool.

#### SPEED CODE "4" ONLY: Timing of the Step Reduction Gear Assembly:

Assemble the planet gears into the planet cage, making sure the notched planet pins fit over the planet cage washer. Rotate each gear until the aligning hole — on the end of one gear — is diametrically opposite the "X" mark of the other gear. Hold the gears in this position and slip the planet cage into the internal gear. It's important to avoid "wiping out" the gear teeth.

This is the only position where the gear teeth are lined up.

### MOTOR REASSEMBLY

1. Install ball bearings into both the front and rear plates.  
2. Assemble rotor to rear plate/bearing assembly with the rotor's retaining screw. **Position and set the rotor as close as possible to the rear plate, without dragging or rubbing.**

- a. A good practice is to stone the blade slots and polish the ends with a medium grit emery cloth.
- b. Assemble components making sure the bearing is firmly seated in the rear plate

3. Begin tightening rotor screw without over-tightening to avoid damaging the ball bearing. Alternately spin the rotor while tightening until clearance is judged to be proper—**about 0.001" clearance.**

One method, shown below, is to hold the rotor/rear plate assembly vertically (plate downward) and strike the edge of the plate with a wood block.

Begin tightening rotor nut without over-tightening to avoid damaging the ball bearing. Alternately spin the rotor while tightening until clearance is judged to be proper—**about 0.001" clearance.**

Hold the rotor/rear plate assembly vertically (plate downward) and strike the edge of the plate with a wood block.

# DOTCO 90° Heavy Duty Angle Heads

Angle Head Assembly Part Number	Assembly Includes Output Spindle Part Number	Spindle Thread Size (Internal)	Termination Code
1025547	1110062	#10-32	-51
1021289	1008850	1/4"-28	-52
1021292	1008948	9/32"-40	-53
1021291	1008856	5/16"-24	-54

(male thread)

1021620	1015703	3/8"-24	-59
---------	---------	---------	-----

**LUBRICATION**

Only Molykote is recommended for use in these angle heads. Wipe on only a very small amount and remove any excess.

**REASSEMBLY (WITH NEW COMPONENTS)**

Rebuild the output spindle components using a NEW #1008849 Nut. Lightly coat the bevel gear with Molykote and install in angle head. No shims are required between these components.

Install #1008859 Retaining Ring and make sure spindle turns freely.

**Shimming:**

Next, place ball bearing, one 0.002" shim (#1008748) and bevel pinion on end of spindle extension (#1009643). Normally, only one shim is all that is required. Wipe a small amount of Molykote on bevel pinion and install in housing, threading housing and angle head together.

**Checking gear mesh:**

Hold end of spindle extension with fingers and turn output spindle back-and-forth. Acceptable play is 0.005", or less. Add only one shim at a time (or take out one shim) until play is correct.

( • ) Indicates recommended spare part. Order one (1) or one set for every 6-10 tools. Small, easily lost or low cost parts should also be ordered on the basis of 3-4 per 10 tools.

# DOTCO 90° Miniature Angle Heads

Angle Head Assembly Part Number	Assemblies Include Output Spindle Part Number	Spindle Thread Size (internal)	Termination Code
1025314	1019553	#10-32	-61
1025409	1019551	1/4"-28	-62
1025313	1019552	9/32"-40	-63
1025328	1019554	5/16"-24	-64

**LUBRICATION**

Only Molykote is recommended for use in these angle heads. Wipe on only a very small amount and remove any excess.

**REASSEMBLY (WITH NEW COMPONENTS)**

1. Start with one only 0.002" shim (part #1006265) above work spindle in bearing pocket. Assemble all output spindle components, applying Molykote, then tighten bearing cap to 15 inch-pounds torque. This is for **END PLAY** only. With too much play, take out the 0.003" shim. A slight back-and-forth amount of play is acceptable and necessary.
2. Assemble all remaining components and check gear "shake". This is for **GEAR MESH** which should be no more than 0.005".
3. Be sure to apply Molykote before assembly.

**EXTRA EQUIPMENT:**

1019759 Spanner Wrench (service wrench not supplied with angle head assemblies).

(\* ) Indicates recommended spare part. Order one (1) or one set for every 6-10 tools. Small, easily lost or low cost parts should also be ordered on the basis of 3-4 per 10 tools.

# DOTCO 90° Compact Angle Heads

Angle Head Assembly Part Number	Assemblies Include Output Spindle Part Number	Spindle Thread Size (Internal)	Termination Code
1025667	1110261	#10-32	-71
1025477	1019879	1/4"-28	-72
1025476	1019880	9/32"-40	-73
1025668	1110262	5/16"-24	-74

**LUBRICATION**

Only Molykote is recommended for use in these angle heads. Wipe on only a very small amount and remove any excess.

**EXTRA EQUIPMENT:**

1019759 Spanner Wrench (service wrench not supplied with angle head assemblies).

(\*) Indicates recommended spare part. Order one (1) or one set for every 6-10 tools. Small, easily lost or low cost parts should also be ordered on the basis of 3-4 per 10 tools.
