DOTCO 15LS, 15LN, 15SS & 15SN Series Right Angle Drills

Parts Manual 45-8400 PL31-15LS2 04/21/2011

For additional product information visit our website at http://www.apextoolgroup.com

SAFETY FIRST!

ALWAYS COMPLY WITH:

- 1. General Industry Safety & Health Regulations, Part 1910, OSHA 2206, available from: Sup't of Documents; Government Printing Office; Washington DC 20402
- Safety Code for Portable Air Tools, ANSI B186.1 available from: American National Standards Institute, Inc.; 1430 Broadway; New York, NY 10018
- 3. State and Local regulations.

Portions of the above codes and regulations are listed below for quick reference.

THESE EXCERPTS ARE NOT INTENDED TO BE ALL INCLUSIVE – STUDY AND COMPLY WITH ALL REGULATIONS!

WARNING FAILURE TO COMPLY WITH ALL SAFETY REGULATIONS MAY RESULT IN SERIOUS INJURY.

Safe Work Practices Symbol

WARNING The signal word "Warning" identifies all notes on safe work practices in this operating instruction, alerting to hazards for life and health of people. Observe these notes and proceed with special care in the cases described. Pass all safety instructions on to other operators. In addition to the safety instructions in this operating instruction, the general local safety and accident prevention rules must be observed.

- 1. TOOL INTENT Tools shall be used only for purposes intended in their design (refer to product catalog).
- AIR SUPPLY Test and operate tools at 90 PSIG maximum unless tool is marked otherwise. Use recommended airline filters—regulators—lubricators.
- UNUSUAL SOUND or VIBRATION If tool vibrates or produces an unusual sound, repair immediately for correction.
- 4. OPERATOR PROTECTIVE EQUIPMENT Wear goggles or face shield at all times tool is in operation. Other protective clothing shall be worn, if necessary. SEE REGULATIONS.
- SAFETY MAINTENANCE PROGRAM Employ a safety program to provide inspection and maintenance of all phases of tool operation and air supply equipment in accordance with "Safety Code for Portable Air Tools."

Important Notes

CAUTION The signal word "caution!" identifies all portions of this operating instruction meriting special attention to ensure that guidelines, rules, hints and the correct work procedures are observed; and, to prevent damage to and destruction of the machine and/or parts.

1 The number in a square is a *"service note"* reference indicating additional information for the correct assembly or disassembly of this product. See Service Note page at end of this manual.

(•) Indicates recommended spare part (or set) for every five (5) tools. Small, low cost or easily lost parts should be stocked as 3-4 per 10 tools.

warning Disconnect the air supply hose before servicing the tool.

INSTALLATION & OPERATION

All 15LN2.. & 15LS2.. models covered by this parts list...

These models are lever operated horizontal-type motors with angle heads. The operator actuates and releases the lever which starts and stops the air motor, gearing and output spindle.

For best tool performance, a working air pressure of **90 pounds per square inch** is recommended. Pipings, fittings and hose should be adequate to maintain **90 psig** while the tool is in operation. An air line filter and lubricator, such as Cooper Power Tool's #F02-M Filter (1/4" NPT) and #L02-EP Lubricator (1/4" NPT) should be used (refer to Cooper's "F-R-L" brochure). Hose should be blown out before attaching to the tool.

LUBRICATION

Motor

Lubricate the motor with an air line lubricator, using a light air tool oil. Adjust the lubricator to dispense one drop per cycle or three drops per minute. This oil is available in one (1) quart (540397) or one (1) gallon (533485) quantities. A high film strength oil (536333) is also available;

this oil cannot be used in Atomist type lubricators, use only with Economist or serv-oil type lubricators.

Planetary Gearing

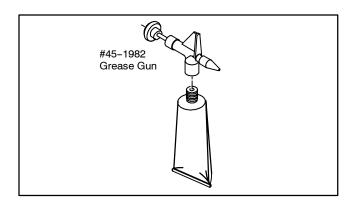

Thoroughly grease all gears with Cooper Power Tools teflon grease every 100,000 cycles. Whenever the tool is disassembled, pack the gearing with approximately 1/4 ounce of grease. Teflon grease is available in one (1) pound cans (*513156*) or two (2) oz. tube (*540395*).

Establish a routine inspection and re-lubrication program, **don't short cut.** Re-lubricate planetary by filling 1/3 to 1/2 full. Midget grease fittings are provided on the gear housings and internal gears for external lubrication. Too much grease will cause overheating.

CAUTION Do not use substitutes for oil and grease. This could result in damage to the tool.

Angle Head Gear Lubrication

When angle head gearing is replaced, wipe on a **thin** coat of Molykote, grade G; only a small amount is necessary. An 8 ounce tube is available under part number 540394. Molykote has been shown to improve the wearing characteristics of angle gearing.

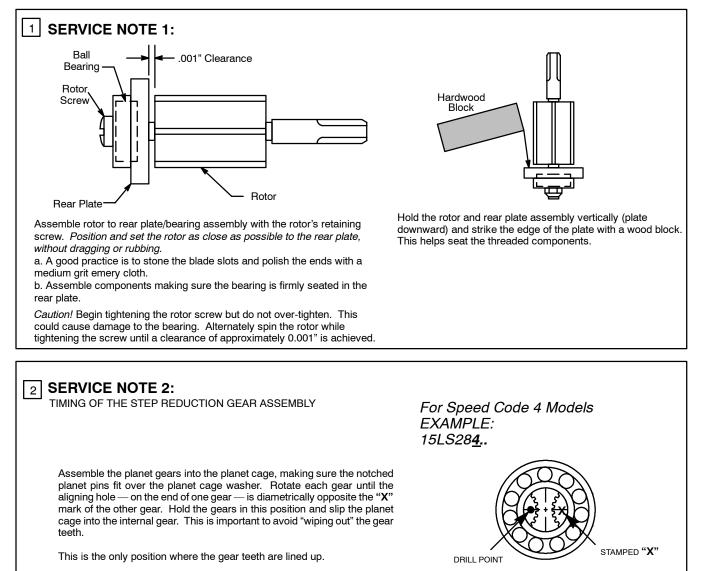

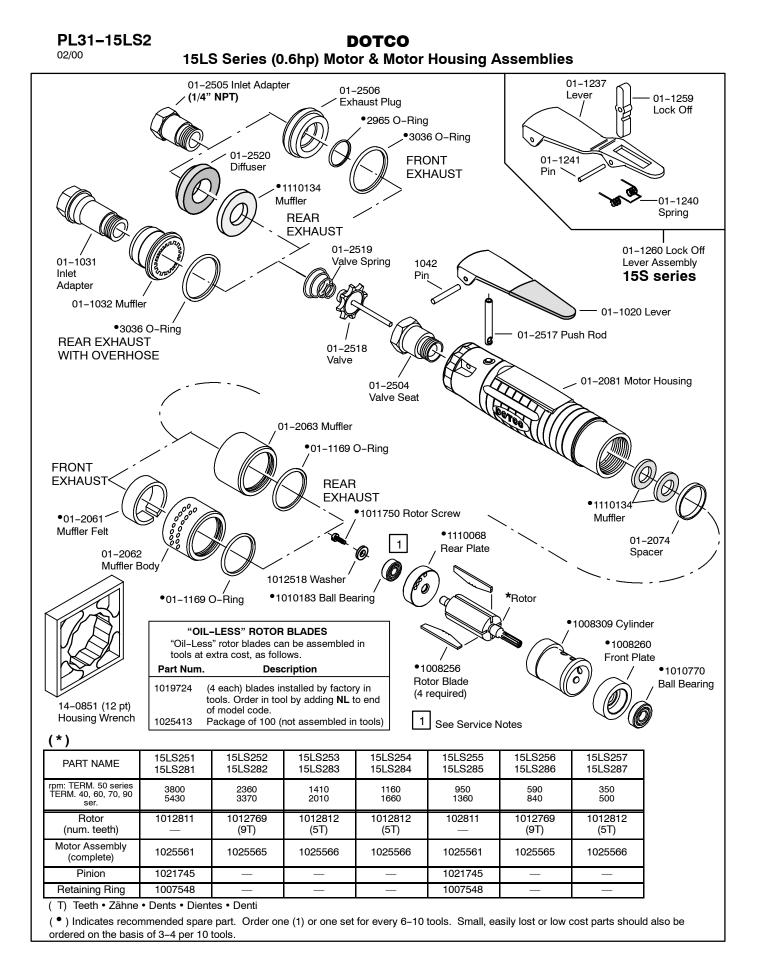

PARTS INSPECTION

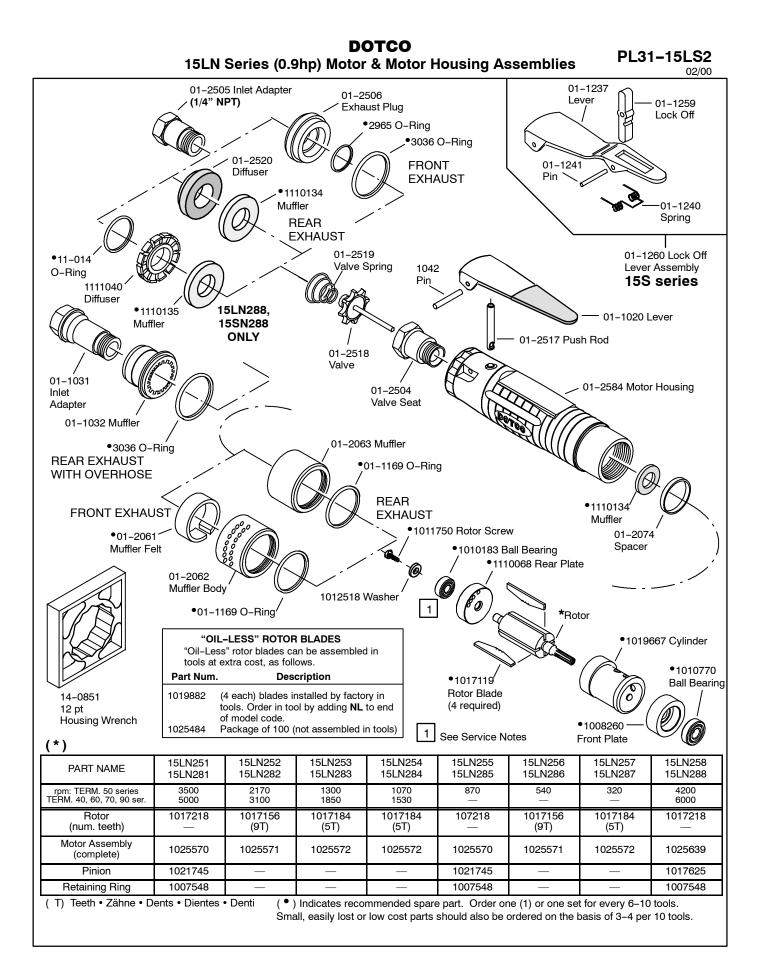

1. Wash all parts except ball bearings in solvent. Dry and place on a clean cloth for inspection.

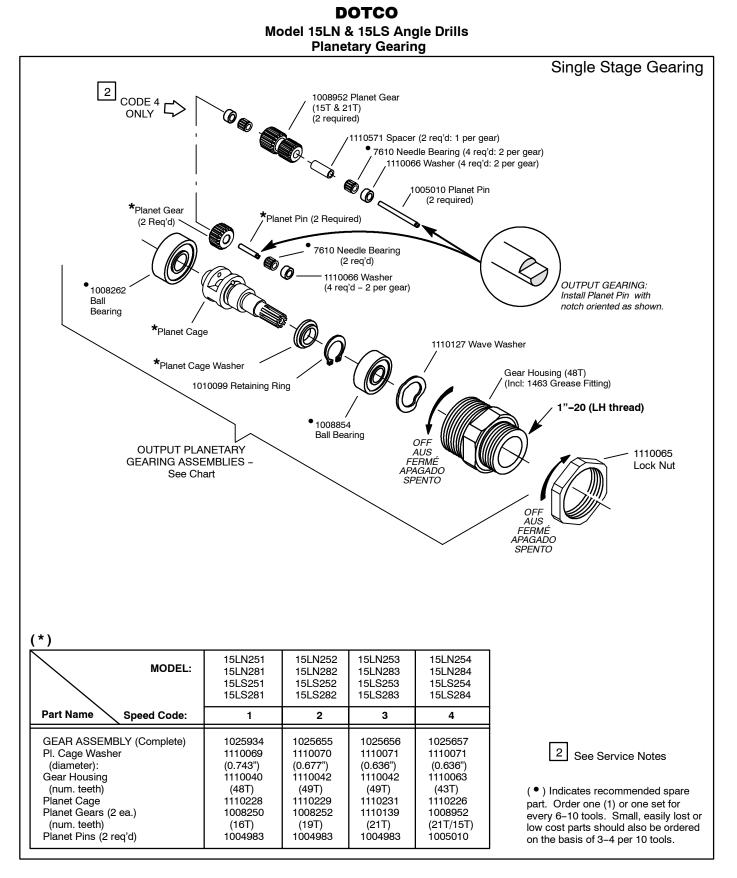

Check ball bearings for wear. Bearings should turn smoothly with no appreciable shake or looseness.
Check rotor blades for wear by comparing with a new blade. Replace if worn more than 1/32" in height.
Check motor cylinder for grooves, gouges or pitting. Honing is permissible, however, never remove more than about 0.001" or 0.002" of material. Replacement is usually recommended.

DOTCO[®] 15LS2.. & 15LN2.. Series SERVICE NOTES

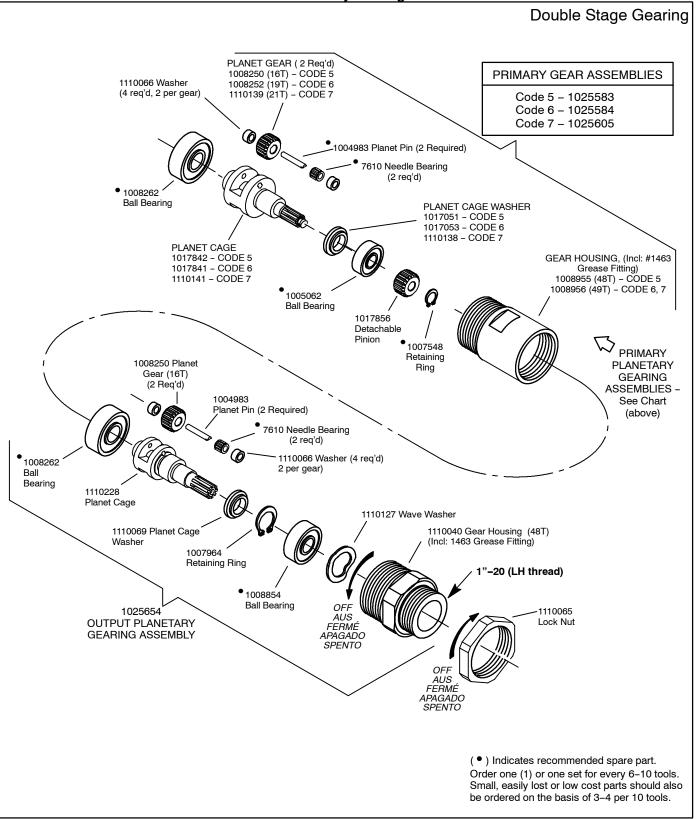

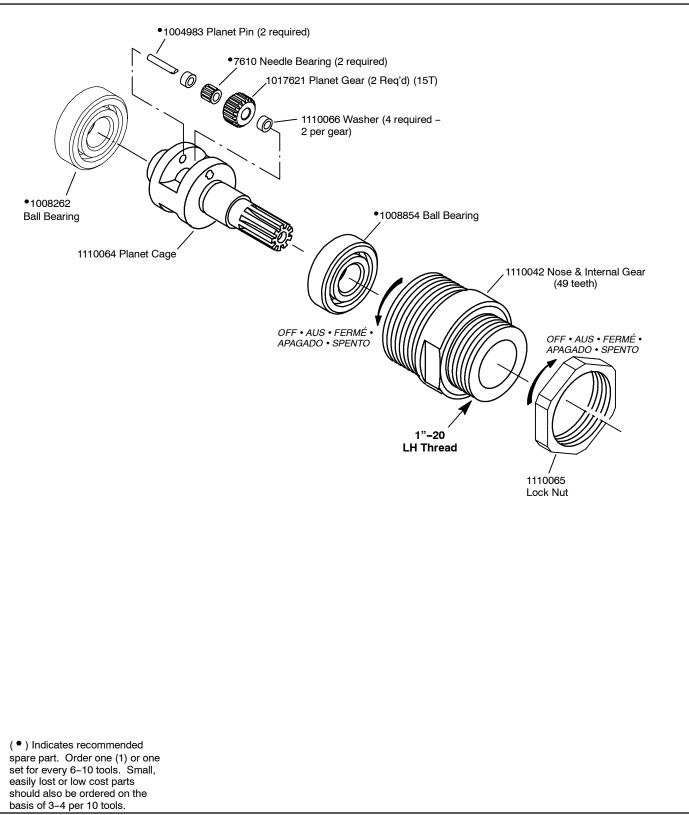

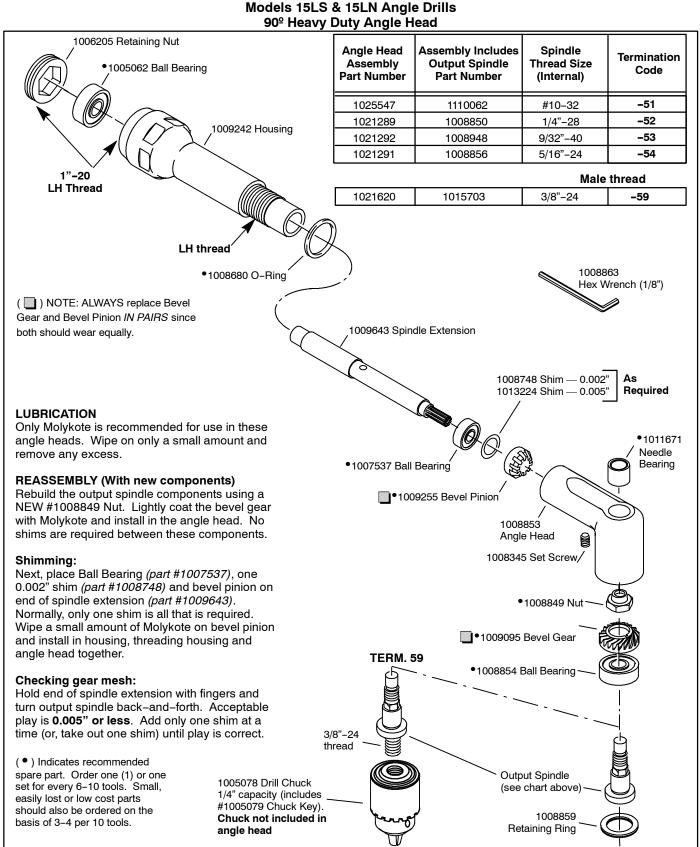

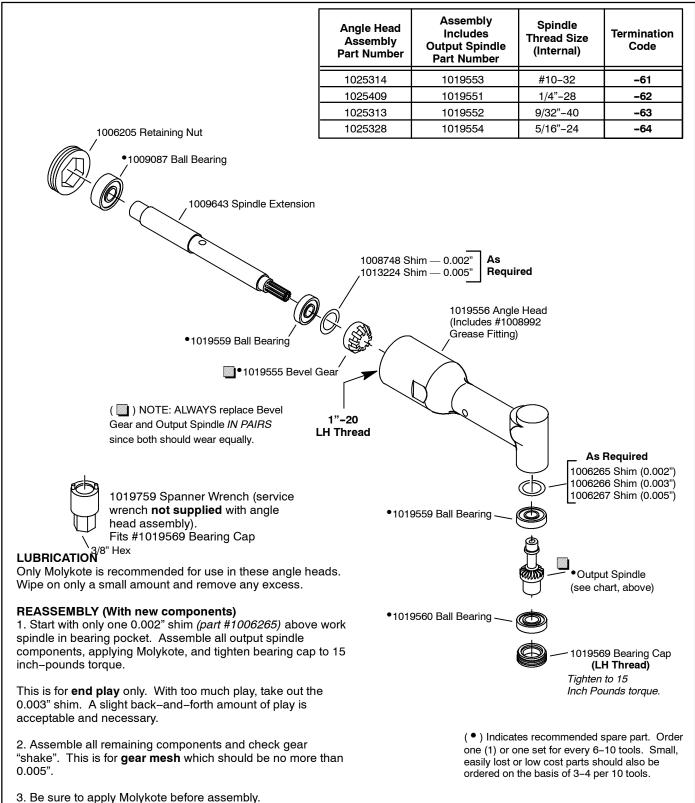

DOTCO Model 15LN288 (0.9hp) Angle Drill 4200 or 6000 RPM Planetary Gearing

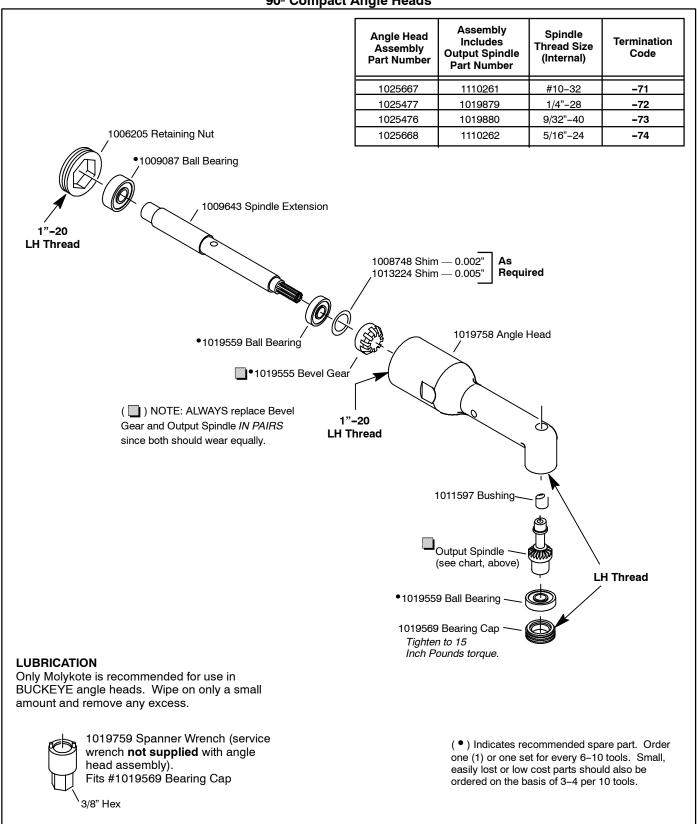

DOTCO

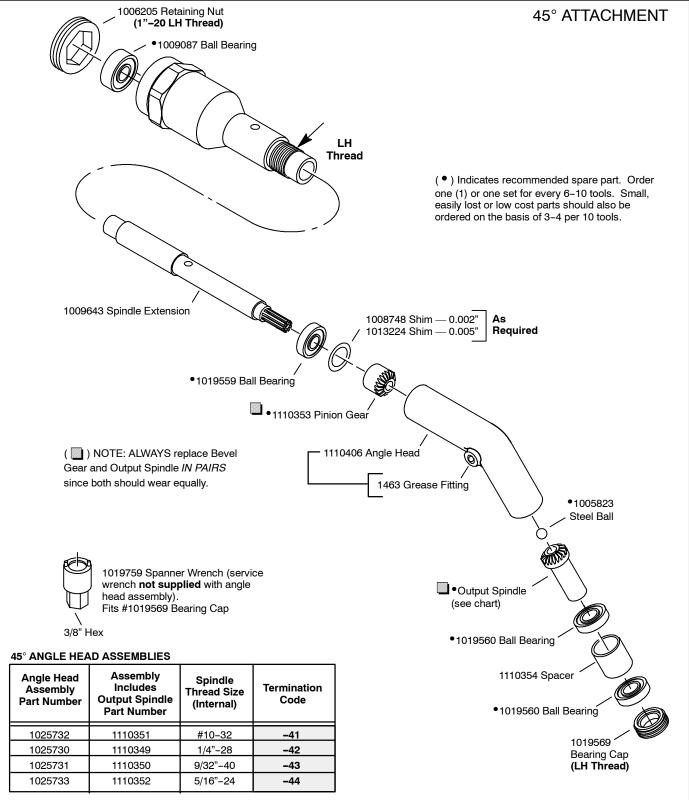

DOTCO Models 15LS & 15LN Angle Drills 90º Miniature Angle Heads

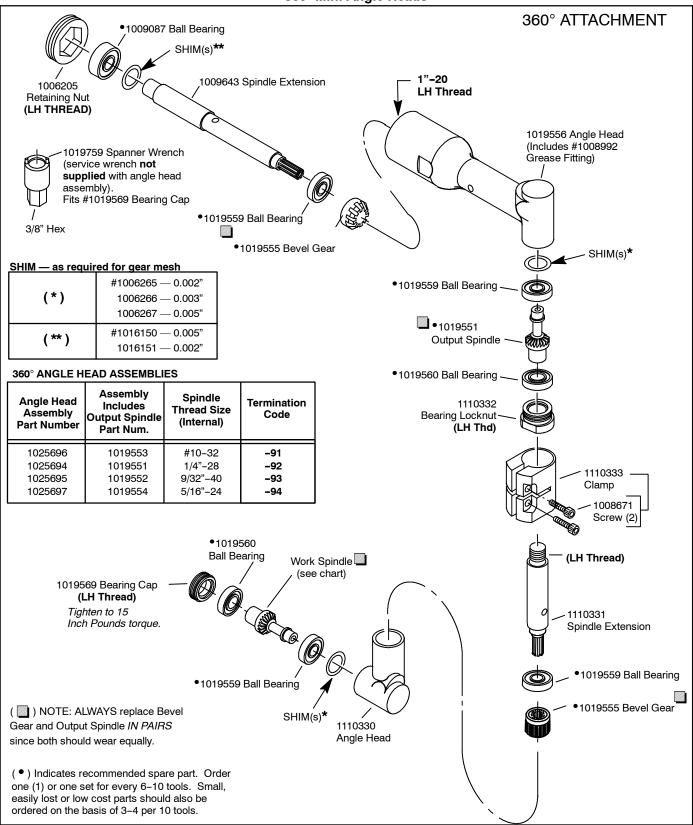

DOTCO Models 15LS & 15LN Angle Drills 90º Compact Angle Heads
